

FOREIGN LABOR IN ENGLAND.

Democratic organs are continually pointing out how prosperous England has been under free trade auspices.

The government of England has recently taken steps to ascertain the condition of the labor market.

A very astonishing state of affairs has been revealed. Men who work at certain parts of shoes are called sweaters. They work from six o'clock in the morning until midnight, eating their miserable meals without rising from their seats, and at night he down with their clothes on because they do not have enough life left in them to undress.

They earn four shillings a day, and some men have to support a family on this miserable pittance.

It was developed in the investigation that this terrible state of affairs had been brought about by the importation of cheap laborers from other countries of Europe, and the competition of foreign manufactures.

England has fostered pauperism by free trade and by allowing cheap labor to eat out the vitals of its manufacturing industry. Do the Democratic free trade organs want the healthy body of American manufactures inoculated by the free trade virus?

What a place this Coast would be were manufactured goods allowed to come from China free of duty! Wealthy firms would at once remove their plant to China, initiate the Mongolians into the ways of American Workmen, and by hiring Chinese at two cents a day, wipe out every manufacture on this Coast.

This country is no longer the refuge of the oppressed, the hospital and asylum of nations, but a place for Americans to enjoy the highest gifts of God and nature. It is a self-supporting, free country, independent of Europe and her thieves and paupers.

We can manage our own affairs, manufacture our own goods, grow our own staples and raw material, and enjoy the profits of our own industry.

But to do this we must shut the gates against undesirable neighbors and against the products of pauper labor.

Chronicle Please Read.

When the Chronicle insists that there is no free trade in Cleveland's message it is quite evident that our contemporary has never found time to peruse the document in question. In his message, Cleveland says:

"When the number of farmers engaged in wool-raising is compared with all the farmers in the country, and the small proportion they bear to our population is considered, when it is made apparent that in the case of a large part of those who own sheep the benefit of the present tariff on wool is illusory and above all, when it must be conceded that the increase of living caused by a tariff becomes a burden upon those with moderate means on the poor, the employed and unemployed, the sick and well, and the young and old, and that it continues to tax which with relentless grasp is fastened upon the clothing of every man, woman and child in the land, reasons are suggested why the removal or reduction of this duty should be included in a revision of our tariff laws."

Cleveland has singled out the sheep raiser as a sort of "test case."

If Democratic free trade downs him, the other industries of the United States will be crushed in turn.

The Lyon County Times proposed Senator Stewart as a candidate for the Republican nomination for President. Every State has its favorite son, many of the favorites being dark horses, of course, and Nevada has a right to speak its little piece and make an entry. The Senator would not be a dark horse long if he came out as a candidate, and as President he would let the world know that America is a self-take-care-of-itself country. His persistent energy in the interests of Nevada indicates the kind of Executive he would make, and his thorough knowledge of affairs would give his administration a character which would make it a salient period in American history.—Enterprise.
